Mission Statement of the Planning Board

The Fort Wright Nature Center Planning Board is a volunteer-based arm of the City of Fort Wright. It is dedicated to the preservation of a natural green space and management of the natural, scenic, historic and cultural resources associated with the Fort Wright Nature Center.

Our goal is to serve the community by promoting appreciation for the environment and providing educational opportunities for visitors of all ages.

For these reasons we ask that you follow the rules to protect delicate plants and wildlife.

 Queen Anne's Lace,
 Thistle,
 Evening Primrose,
 Butterfly Weed

FORT WRIGHT, KENTUCKY

The Fort Wright Nature Center

Christmas Fern

In the Fall of 1995 the City of Fort Wright, Kentucky decided to preserve 13 acres of wooded hillsides on Highland Pike, donated to the city by the George Kreuzjans Family. The citizens and the city developed the Fort Wright Nature Center. Ten years of work by the city and many volunteers has contributed to trail construction, parking, habitat enhancement, shelter construction and has resulted in almost 5 miles of scenic trails. In 2004 construction of a large pond was completed to help regulate the water runoff from surrounding neighborhoods and erosion along the Moser Branch Creek. The sewer system that ran through the creek was relocated to improve the water quality of the creek.

Please:
 Stay on trails.
 Keep dogs on leashes.
 Carry out your own garbage
 Carry out other garbage too.
 Don't pick flowers or harvest trees.

No Swimming
 No Firearms
 No Boating
